Fly 1701.

Of the Eclipses this Year, 1701.

THere will be Four Eclipses this Year; Two of Sun and Two of the Moon:

The First will be of the Sun, upon the 27 day of January, 30 m. after midnight. Therefore to us invisible but conspicuous to our Antipodes.

The Second will be of the Moon, on the 11 day of February, 10 min. after 11 at night; at which time shall see more than half the Moon's Body obscured.

The Third will be of Sun, upon the 24 day of July, 2^h 10 in the Forenoon.

The Fourth will be of the Moon, upon the 7 day of August, at 15 min. after 1 in the afternoon, but will be visible to us in England.

The beginning of the four Quarters of the Year 1701.

THE Spring begins the 11th of March, 10 min. after 7 in the morning.

Summer begins the 11th day of June, at noon.

Autumn begins the 12th of September, at noon.

Winter begins the 11th of December, at noon.

Fl 1701.

Rules concerning Husbandry.

When you would Plant or Graft, consider where the wind bloweth, if it be in the South; it is very good purpose, but if in the North or East it is not good. It is good to Plant or Graft generally the Moon encreasing in the Signs, Taurus or Aquarius, in the beginning of the year, or latter end of Harvest.

Plant trees for continuance, when the Moon is in Taurus, or Aquarius.

Plant Timber to have it sound, in December or January, in the wane of the Moon in Aquarius or Pisces.

Plant Trees, & pull off the Moss in the Month of February. Cut Hedges, and lop Trees for Fewel, that the Heads may better grow again, when the Moon is in Aries or Libra, in her increase.

Plant young Quicksets from September to March.

Plant young Trees in the last quarter of the Moon when the Moon is in Aries, Libra, Scorpio, and in these Months, September, November, February.

Plant Vines in February, March, or September, especially when the Moon is in Aries, Libra, Scorpio, in her increase.

Plant Rose-Trees in the midst of February, the Moon encreasing.

Plant or Prune Trees in March or April, the Moon in Taurus, or Capricorn.

Plant Fruit, as Apples, Pears, and the like, at the full of the Moon, in the afternoon, the weather being fair and dry.

Mow down Hay presently after the full of the Moon.

Plant Ground to prevent growing of Weeds, the Moon encreasing.

Sow Carrot-seeds about the end of February, or the beginning of March, the Moon encreasing. Also sow Onions and Peas in February or March, at the wane of the Moon.

Sow Cucumbers and Melons in February or March, or June, at a fair day.

Sow Parsley, Fennel, and Anniseed, in February or at the full of the moon.

Sow Marjeram, Violets, Time, Rosemary, and Lavender in February, March, or April, in the increase of the moon.

Sow Gilflowers and Wall-flowers, in March or April, at the old of the moon.

Sow Hyssop and Savory in March, when the moon is old.

Sow double Marigolds in February or March, in the increase of the moon.

Shear Sheep at the increase of the moon.

The best time to Geld Cattle the moon being in Aries, Taurus, or Capricorn.

Of Blood-letting, and some other Physick Observations.

IN Youth let Blood from the change to the first quarter; in Middle-age, from the first quarter to the full: in Elderly, from the full to the last quart. in Old-age, from the last quarter to the change. But know, that under the Age of 16 above the Age of 56 it is not good to bleed at all.

Again, in the Canicular, or Dog-days, it is very hurtful to take any Physick at all, unless there be great need: indeed Necessity hath no Law: wherefore in such a case, if a disease being desperate, the cure must be adventured.

Take a Purgation when the moon is in Trine, or Square aspect with Venus, decreasing in any of these three Signs, Cancer, Scorpio, or Pisces, and it will be sure to work better, because when a moist Planet, in a moist Sign, in such an aspect, the humours in the Body are then stirred up, and so the better purged out; wherefore in this case it cannot be amiss to prepare humours by something cathartic; and let this be done whilst the moon is either in Gemini, Libra, or Aquarius.

Take a Vomit, that it may work thoroughly, when the

be chewed in the taking of Medicines.

ally, if necessity urge no haste, these observations are
clear; for it is a plain truth, that the change of weather
differing aspects, doth greatly change and alter mens
